

DEXTER[®]

FOODSERVICE

DEXTER1818.COM

A HANDLE. A BLADE. AND 200 YEARS OF EXPERIENCE.

We've learned many lessons since we started in 1818. Everything from remembering to watch our fingers to how to perfectly balance our knives and tools. Our customers choose our knives, and because they do, we honor the responsibility that comes with it.

The vast majority of our knives and tools—including more than 1,000 unique styles—are made by about 250 craftspeople in Massachusetts. And the craft of knifemaking is one that our family has darn-near perfected by combining tradition with technique and modern technology. Oh, and over 200 years of fine-tuning.

1818

Henry Harrington starts the first American cutlery company in Southbridge, MA.

1933

The two companies come together and eventually become Dexter-Russell.

1959

The iconic Ted Williams fishing knife launches, receiving instant acclaim from outdoor enthusiasts.

2022

The ROSS-1™ robotic sharpening system, which sharpens thousands of knives a day, is introduced to the processing industry.

OUR HISTORY

1834

John Russell establishes the John Russell Cutlery company, ultimately replacing European brands and becoming the leading American cutlery company of the post-Civil War era.

1941

The first SANI-DEXTER knives are introduced, eventually evolving into the SANI-SAFE® series that remains the gold standard in food-service today.

1994

The new Offset Bread Knife launches, and delis are forever changed.

DEXSTEEL®

WHAT'S STEEL GOT TO DO WITH IT?

Dexter proprietary DEXSTEEL® is a mix of high-carbon, high-alloy stainless steel that is specially engineered for professional knives. This special blend of elements enhances:

Sharpness • Edge holding • Corrosion resistance • Ease of re-sharpening

DexSteel® supports a finer grain structure which increases tensile strength for durability and toughness.

HACCP IS WHERE IT'S AT

Hazard Analysis Critical Control Points (HACCP) is an internationally recognized method of identifying and managing food safety related risk and, when central to an active food safety program, can provide your customers, the public, and regulatory agencies assurance that a food safety program is well managed.

WE HAVE A HANDLE ON SUSTAINABILITY™

CRAFTED WITH
Ecogrip®

SANI-SAFE® handles are made with 100% recycled material and packaged in recyclable PETE plastic and card materials.

SERIES SELECTION GUIDE

SANI-SAFE® Series Pages 7 - 12

12433

SANI-SAFE® knives and tools are an industry standard thanks to their best-in-class DEXSTEEL® edges that are quick to resharpen; easy-to-clean, slip-resistant grips; and sanitary performance. The handles and packaging are made with 100% recycled plastic, making SANI-SAFE® eco-friendly, chef-tested and commercially approved.

V-LO® Series Pages 13 - 16

29253

Chefs love V-LO® knives for their state-of-the-art design, comfort and control. The dual-textured handles are slip-resistant and provide a firm grip. The DEXSTEEL® blades are made from stain-free, high-carbon steel, and the edges are sharp right out of the box and easy to maintain.

SOFGRIP® Series Pages 17 - 20

24163

True to its name, you know exactly what you're getting with the SOFGRIP® series. It features a soft, non-slip, comfort-first grip designed to reduce stress on the wrist that can cause fatigue and injury. As for the blades, they're made from proprietary DEXSTEEL®, individually machine-ground to exacting specifications with an edge geometry made for long-lasting performance. In a demanding kitchen, SOFGRIP® knives deliver again and again.

Traditional® Series Pages 21 - 24

12381

The look, feel and performance of the Traditional® series has long been appreciated by culinary professionals. Since the early 1800s, as a matter of fact. Warm and polished, each handle is made from natural wood and is secured by brass compression rivets to an American steel blade. It's classic. And we see little reason to change that now.

DuoGlide® Series Pages 25 - 26

40033

DuoGlide® was designed to get the job done while minimizing wrist stress. These ergonomic knives are perfect for long periods of use. The ultra-soft, right-sized handle can be gripped in several ways for comfort and control. With blades made from stain-free, high-carbon steel, these knives assure stress-free slicing.

DEXTER 360® Series Pages 27 - 28

36006

The 360® series includes every knife needed to outfit a commercial kitchen. Its hollow-ground, stain-resistant blades—crafted in the US from American steel—stay sharp with edges that are easily restored. The ergonomic handle combines durable polypropylene with slip-resistant overmolding and comes color-coded to facilitate compliance with food safety programs.

iCUT®-FORGE Series Pages 29 - 30

38466

The iCut®-FORGE series features a blade forged from high-quality German stainless steel for a durable and razor-sharp blade. The full tang design provides a balanced weight while the triple-riveted POM handle ensures comfort and control. Imported.

iCUT-PRO® Series Pages 31 - 32

30404

The iCUT-PRO® series elevates forged manufacturing by combining a high-quality German stainless-steel blade with a Santoprene® handle. The soft and conforming handle provides superior grip and comfort, making it a pleasure to use for extended periods of time. Even while working in wet or slippery conditions, the iCUT-PRO® series provides control and dependable performance. Imported.

Basics® Series Pages 33 - 36

31601

When performance is as important as value, look no further than our BASICS® series of knives. Blades are made from stain-free, high-carbon steel, and are perfect for staying within your budget and on task. Imported.

Cool Blue® Series Pages 37 - 40

19693H

In tough conditions, the Cool Blue® series continues working without sacrificing comfort or control. Cool Blue products withstand temperatures up to 500 degrees and feature solid, high-quality construction for durability and easy cleaning.

SANI-SAFE®

WHITE HANDLE. GOLD STANDARD.

Trusted by pros for more than 50 years, these knives and tools now have handles made from 100% recycled plastic. Eco-friendly, chef-tested, and commercially approved.

SCALLOPED EDGES 101

Knives with scalloped blades feature many curved edges protected by sharp points that help to break through bread's hard crust. As these points break through, the curved edge slices the soft interior without damaging it. Features like offset handles or curved blades allow the user to cut completely through a loaf of bread without contacting the cutting board.

HEAT TREATMENT 101

Heat Treatment is the process of controlled heating and cooling of metals in order to change their physical and mechanical properties. The desired properties for the manufacture of professional cutlery are strength, resistance to wear, and flexibility. This process is key to the production of a small, tight, and consistent grain structure that promotes long edge life.

SOFGRIP®

COMFORT. FOOD.

CARBON STEEL 101

Blades made with carbon steel require extra care. Keep blades clean and dry. Blades may darken with age and use, thus creating a protective patina. If blade rusts, simply remove with abrasive cleanser or steel wool. Clean, dry, and oil for long storage.

SHARPENING SYSTEMS

Rely on the experts in edges for all of your sharpening needs. For quick edge touch-ups and restoring factory sharp edges, Dexter gives you the solution. Each sharpening solution is designed to give you the edge you need to excel in today's demanding and fast paced food service industry.

CERAMIC RODS

3 Rod Ceramic Sharpener

07080 3-WAY

- 3 ceramic rods of varying coarseness for dull or worn edges, partially dull edges, and quick touch ups
- Requires no oil or water when sharpening
- Rods can be rotated for new clean surfaces and cleaned with soap or detergent
- Can be positioned vertically or horizontally
- Rods measure 12" x 1"

CRYSTOLON® / INDIA BENCHSTONE

11 1/2" Crystolon / India Benchstone

07945 EDGE-14

- 150 grit Crystolon stone manufactured with silicon carbide abrasives provides quick sharpening
- 320 grit India stone manufactured with aluminum oxide abrasives creates fine, smooth cutting edges
- Durable, non-slip case creates sharpening station, protects stone, and provides reservoir to keep stone from drying out
- Stone measures 11 1/2" x 2 1/2" x 1"

MANUAL SHARPENER

Tri-stone Sharpening System

07946 EDGE-15

- Combination of 3 different stones
 - 100 grit Crystolon® stone for restoring worn edges
 - 150 grit Crystolon® stone for re-establishing sharp edges
 - 320 grit India stone hones to a fine cutting edge
- 12" stone length permits long strokes for optimal sharpening
- Heavy duty base with non-skid bottom
- Pint of lubricating oil included

ELECTRIC SHARPENER

Electric Edge Sharpener by Edlund Co. NSF

07931 EDGE-21

- Precision guidance system to maintain perfect edge angle
- Stainless steel housing
- Replaceable grinding wheel assembly
- Sharpens plain edge and scalloped edge knives
- Removable ABS knife guide for easy cleaning

HAND-HELD SHARPENERS

EZ Edge Hand-held Edge Sharpener

07920 EDGE-1

- Tungsten Carbide cutting heads for precision sharpening
- Just 3 or 4 strokes and it's sharp!
- Protective handle grip for either left or right-handed sharpening

2-Stage Hand-held Edge Sharpener

07921 EDGE-2

- Dark diamond stones sharpen and hone creating a new edge
- White ceramic stones polish the edge to ultimate sharpness
- Safe and easy to use

BUTCHER STEELS

Dexter knives are shipped from the factory with a super-sharp, feather edge. With continuous use, this feather edge rolls over and the knife appears dull. A few simple strokes on a Dexter butcher steel will realign and restore a sharp edge.

Magnetized, Heavy Weight, Medium Coarseness, Serrated, High-carbon Steel Rod and Hardwood Handles

SHARPENERS

With continued use, every knife will need to be re-sharpened. This can be accomplished by using a Dexter knife sharpener which actually removes steel from the blade and restores the super-sharp, feather edge.

HOW TO PROPERLY STEEL A KNIFE

Hold the sharpening steel in your non-dominant hand and the knife in your dominant hand.

Hold the knife blade at a 20° angle to the sharpening steel, with the base of the blade closest to the handle.

Starting at the base of the blade, draw the blade down the length of the steel while maintaining the 20° angle. Apply moderate pressure but avoid pressing too hard.

Repeat this process on the other side of the blade, matching the number of strokes from the first side.

Remember, honing/steeling a knife using a sharpening steel is not the same as sharpening. Sharpening removes material to create a new edge while honing helps to realign the blade's edge to maintain its sharpness.

Check out our [HOW TO STEEL VIDEO](#)

STORAGE SOLUTIONS

Protect your investment with Dexter Storage Solutions, designed to keep your knives sharp and secure. Dexter has all the products necessary to address knife safety, storage, and transport.
